---

While my background is rooted in computer science, my passion for customer service, communication, and interpersonal skills has drawn me towards the flight attendant profession. I have developed strong problem-solving abilities, attention to detail, and the ability to remain calm under pressure.

## Experience

---

2022 - 2023

**Lead Expeditor** (part-time)

**Barrio Tacos** Salem, MA

**Responsibilities:** Help the kitchen manager to organize and keep the kitchen operating smoothly. Layout trays and plates for orders and made foods ready for food runner. Train new employees coming onboard in kitchen. My work received praise and positive feedback from co-workers and customers.

2013 - 2018

**Python Web Developer**

**Napa Reserve Fine Wines** Shanghai, China

**Responsibilities:** adopted dynamic technique (JavaScript/CSS/jQuery) for company website. Designed and implemented the backend structure of website using Python & Django. Help colleagues to solve IT problems while utilizing the devices within the office.

## Projects

---

**Movie Recommend Website**

2022

The webpage can recommend movies that are similar to user input according to cosine distance between query and the information in database. The project embedded a model that reduced size and enhanced response speed by using Item-CF.

## Education

---
